Alert ID	Publication Date	Reporting Date	Place Name	News Source/Publication Language
5961	10.09.2020	14.09.2020	Bishnupur Manipur	www.thesangaiexpress.com/English https://www.thesangaiexpress.com/Encyc/2020/9/10/Scrub-Typhus-infects-child.html
Title:	2-year-old boy has been found suffering from Scrub Typhus in Bishnupur district-Manipur			
Action By CSU, IDSP -NCDC	Information communicated to DSU- Bishnupur, SSU-Manipur			

A 12-year-old boy has been found suffering from Scrub Typhus at PHC Thanga, said a statement of Dr L Gojendra Singh, CMO Bishnupur. The boy was found suffering from the disease on September 8 and was referred to JNIMS on family's request. His condition is improving, said the CMO stating that Scrub Typhus is endemic in the district and there have been casualties every year due to the disease. Most of the casualties happened due to lack of medical attention. Anyone feeling unwell should report to the nearest PHC/CHC, said the CMO.

Scrub Typhus, also known as bush typhus, is a disease caused by a bacteria called *Orientia tsutsugamushi*. Scrub typhus is spread to people through bites of infected chiggers (larval mites). The most common symptoms of scrub typhus include fever, headache, body aches, and sometimes rash.
