Media alert from the Media Scanning & Verification Cell, IDSP-NCDC.

Alert ID	Publication Date	Reporting Date	Place Name	News Source/Publication Language
3851	24.01.2017	24.01.2017	Ahmedabad Gujarat	www.timesofindia.com/English http://timesofindia.indiatimes.com/city/ahmedabad/35-cases-of-chikungunya-reported/articleshowprint/56743230.cms?null
Title:	35 cases of chikungunya reported in district Ahmedabad, Gujarat			
Action By CSU, IDSP -NCDC	Information communicated to DSU - Ahmedabad, SSU- Gujarat			

Though cases of vector borne diseases declined compared to the previous months, the number of news cases still is significant. In January, 119 cases of vector borne infections were reported till Saturday, out of which 35 cases were those of chikungunya alone. It may be noted that these cases were reported in civic body-run hospitals alone. Health experts claim that even though the cases have declined new cases are still being reported and many of them often go undetected in blood tests but are rather confirmed by clinical diagnosis.
