Title:	Mysterious disease claims hundreds of fowls indistrict Ukhrul, Manipur			
Action By CSU, IDSP -NCDC	Information communicated to DSU-Ukhrul, SSU-Manipur			

Following the outbreak of a mysterious disease at Shakok village at Phungyar block, hundreds of fowls have perished.

In a telephonic conversation with one of the villagers, K Akhai, he said that hundreds of village chickens have died adding that the disease seem to attack the fully grown chickens . During day time, the chickens look healthy with no symptoms of any illness but the next morning they are found dead beneath the shed which is usually built atop trees in the courtyard .

The chickens started dying from November 1 this year, he said and added that anywhere between 10 and 15 chickens are found dead every morning at the village. On dissecting the dead chickens villagers found that the liver of the dead chickens are usually yellowish while the gizzards are found to be stone hard. Reportedly, a similar disease has started to spread to the neighbouring villages such as Leiting, Phaklang and Leishi etc. The villagers are in despair as they have no means to control the fast spreading fowl disease .

Save Water- Save Life, Save a tree- Don't print unless it's really necessary!
