Unique ID.	Name of State/UT	Name of District	Disease/ Illness	No. of Cases	No. of Deaths	Date of Start of Outbreak	Date of Reporting	Current Status	Comments/ Action Taken
KN/BLE/2022/48/938	Karnataka	Ballari	Rabies	02	02	28-11-22	28-11-22	Under Surveillance	Cases reported from Village Badanahatti, CHC Kurugodu, Taluk Ballari, District Ballari. Both cases developed typical symptoms of rabies like dysphagia, hydrophobia, aerophobia, hyper salivation, hyper activity, seizures and insomnia within 10 to 15 days after dog bite. Two suspected Rabies death occurred in a 7 Y/M and 3 Y/F at Indira Nagara and S.T Street respectively in Badanahatti village. According to public and parents, bite was unprovoked and both cases had category III wounds. 7 Y/M has not received any anti rabies vaccine due to negligence and superstitious belief though they were advised to get rabies vaccine. 3 Y/F had received 04 doses of anti-rabies vaccine (ID route). The witnesses felt that dog appeared to be mad, had aggressive behavior with hyper salivation. On 1st Nov 2022 dog has been killed by public. District and Taluka RR Team visited and conducted Surveillance activities in the village. THO, MO and CHO were instructed to conduct the survey to find any other suspected Rabies dog bite cases, to conduct IEC activities for the villagers about Rabies disease, wound management and importance of ARV in any Animal bite conditions. Grama Panchayath and Veterinary department conducted the necessary rabies preventive and control measures especially dog restraining activities.
